International Long Term Ecological Research Network 2nd Open Science Meeting

ILTER invites a wide range of research communities to its second global scientific conference on long-term ecosystem, critical zone and socio-ecological research.

THEMES

Drivers of long-term changes in biodiversity, ecosystem integrity & ecosystem functions

Climate change impact on ecosystem processes

Altered nutrient cycles and environmental pollution

Advances in long-term socio-ecological research and sustainability science

New methods, technology and innovative science support services

Global research infrastructures

Venue: UFZ | Leipziger KUBUS | Leipzig | Germany

<http://www.ilter-2019-leipzig.de>

WHY? Inspired by the experiences and feed-back from the first ILTER Open Science Meeting 2016 in Kruger NP, South Africa, ILTER decided to organize an OSM every 3 years to foster scientific exchange and community building within and beyond the LTER networks around the globe. The call for abstracts will follow later in 2018.
