INTRODUCTION TO THE NRF	
The National Research Foundation (“NRF”) is a juristic person established in terms of the National Research Foundation Act, Act 23 of 1998, and a Schedule 3A Public Entity in terms of the Public Finance Management Act.	
The NRF is the government’s national agency responsible for promoting and supporting research and human capital development through funding researchers, provision of the National Research Platforms, and science outreach platforms/programs to the broader community. The NRF provides these services in all fields of science and technology,	

including natural science, engineering, social science, and humanities.

The NRF delivers its mandate through its internal business units which are both functional and geographical diverse. Unless specifically noted, all contracts flowing from bidding apply to all of its business units.

INTRODUCTION TO THE NRF BUSINESS UNIT RESPONSIBLE FOR THIS BID

The South African Environmental Observation Network (“SAEON”), a business unit within the NRF, is mandated with Long Term Environmental Observation to detect and understand the impacts of Global Change in South Africa. Six SAEON nodes are strategically situated across geographic regions representing the country’s major biomes. SAEON coordinates an array of multi-disciplinary observation platforms and research programs that are designed to monitor and understand Earth system dynamics and human induced changes to these over multiple scales. These initiatives are currently being advanced through the development of a coordinated sophisticated instrument network that must contribute quality, long-term environmental data for research that will ultimately guide evidence-based policy and decision-making. SAEON is committed to scientific excellence.

CONTEXT OF THE PROJECT

The Agulhas System Climate Array (ASCA) is designed to provide long term observations of Agulhas Current volume, heat and salt transport and its variability from mesoscale (eddies), through seasonal to interannual timescales, to enable us to understand its contribution to the Thermohaline Circulation and thus its impacts on climate variability and climate change. This is being achieved by means of two shelf and seven full-depth tall moorings, interspersed with five Current- and Pressure-recording Inverted Echo Sounders (CPIES), measuring pressure, current velocities, temperatures and salinities. The ASCA shelf and tall moorings extend 200 km offshore along the descending TOPEX/Jason satellite ground track # 96, through the core of the Agulhas Current, with CPIES measurements extending the array to 300 km offshore.

The ASCA provides data on physical oceanographic parameters by means of various instruments throughout the water column to a depth of 4500 m, along a pre-determined transect just south of East London. This is undertaken by means of deep ocean moorings, which are held in place by counter weights, with the instruments attached to PA6 coated galvanized steel wire rope, terminating in sub-surface floatation buoys.

THE BIDDING PROCESS

This bid is evaluated through a three-stage process

Stage 1 – Compliance to Requirements including Mandatory as these are GO/NO GO gates

Bidders warrant that their proposal document has, as a minimum, the specified documents required for evaluating their proposals. The NRF provides the Returnable Document Checklist listing these and which documents are mandatory (GO/NO GO) at the end of this invitation for the bidders.

The NRF evaluates only procurement responses that are 100% acceptable in terms of the Returnable Document List. The NRF disqualifies bidders not compliant with this list for Stage 2.

Stage 2 – Evaluation of Bids against Specifications and Quality

The NRF evaluates each bidder's response to the specifications issued in accordance to published evaluation criteria and the associated scoring set outlined in this bid invitation.

The NRF will where circumstances justify request an evaluation sessions such as interviews/presentations/pitching sessions/proof of concept with short-listed bidders before concluding the evaluation.

Bidders making the minimum evaluation score will pass to stage 3.

Stage 3 – Price/Preference Evaluation

The NRF compares each bidder's pricing proposal on a fair and equitable basis taking into account all aspects of the bids requirements. The NRF ranks the qualifying bids on price and preference points claimed in the following manner:

Price - with the lowest priced Bid on an equal and fair comparison basis receiving the highest price score as set out in the Preferential Procurement Policy 2011 Regulations;

Preference - preference points as claimed in the preference claim form (SBD6.1) added to the price ranking scores; and

The NRF selects the bidder with the highest combined score to contract with subject to the bidder having supplied all the relevant administrative documentation. The NRF reserves the right in terms of section 2(1)(f) of the Preferential Procurement Policy Framework Act to evaluate the final bidder selection on the grounds of objective reasons excluding price and preference.

Bid Procedure Conditions:

Counter Conditions

Response Preparation Costs

The NRF is NOT liable for any costs incurred by a bidder in the process of responding to this Bid Invitation, including on-site presentations.

Should any of the fronting indicators as contained in the "Guidelines on complex Structures and Transactions and Fronting", issued by the Department of Trade and Industry, be established during such inquiry/investigation, the onus will be on the bidder to prove that fronting does not exist. Failure to do so within a period of 7 days from date of notification will invalidate the bid/contract and may also result in the restriction of the bidder to conduct business with the public sector for a period not exceeding 10 years, in addition to any other remedies the NRF may have against the bidder concerned.
